

Instrument cable with 360° metal strain relief

EnovaNxt cable for guitarists

The center piece of the EnovaNxt instrument cable is the 360° metal strain relief, which outperforms conventional types notably. The design withstands a higher force than traditional strain reliefs and therefore minimized the risk of cable breaks and other damages considerably.

With Enova's patented «True Mold» Technology, the instrument cable merges the individual connector parts and the cable into a fully integrated, ready-made-cable. As a result of this new design approach, the cable is robust and long-lasting, ideal for on-stage applications. The EnovaNxt instrument cable is based on the widely used 1/4" standard. Its modern and slick designed allows for an optimized grip and handling. The tapered design results in an optimized cable outlet and prevents drooping cables, the ideal solution for on-stage applications. Like all other EnovaNxt products, the instrument cable is developed in and manufactured in Europe.

Features & Benefits

- Excellent sound transmission thanks to high-quality components
- 360° metal strain relief, reducing the strain on the soldering contacts
- Design for harsh on-stage applications for a long-lasting use
- Bending protection for a smooth cable exit at the connector end
- Moisture protection thanks to True Mold technology
- Individual connector parts and cable merge into a fully integrated product

Article description	Length	GTIN / EAN	Short description
NXT-I1-PLMM2-3	3 m	7640383076495	3 m instrument cable - 6.3 mm jack mono with True Mold technology
NXT-I1-PLMM2-5	5 m	7640383076501	5 m instrument cable - 6.3 mm jack mono with True Mold technology
NXT-I1-PLMM2-6	6 m	7640383076518	6 m instrument cable - 6.3 mm jack mono with True Mold technology
NXT-I1-PLMM2-8	8 m	7640383076525	8 m instrument cable - 6.3 mm jack mono with True Mold technology
NXT-I1-PLMM2-10	10 m	7640383076532	10 m instrument cable - 6.3 mm jack mono with True Mold technology
